Vehicle Valuation

Enter vehicle details to estimate the selling price.

Vehicle Details

Vehicle Manufacturing Year: 2017

Vehicle Condition Score: 35.50

Odometer (Miles): 54000

Market Reference Price / MMR (₹): 150500.00

Predict Selling Price

How It Works

1. Enter vehicle details

Add the manufacturing year, condition, odometer, and MMR.

2. Analyze the vehicle

The trained Random Forest model processes the four input features.

3. Review the estimate

View the estimated selling price and compare it with MMR.

4. Explore business analytics

Review trends from predictions generated in this session.

The estimate depends on the training data and input quality. It is not a guaranteed selling price.

Vehicle valuation completed successfully.

💰 Vehicle Valuation Report

ESTIMATED SELLING PRICE

₹137,135.00

Prediction generated: 2026-10-24 23:55:08

Market Reference (MMR)	Predicted Price	Difference vs MMR
₹150,500.00	₹137,135.00	₹-13,365.00

The estimate is below the entered MMR reference value.

Difference versus MMR is not actual profit. The predicted price is not guaranteed.

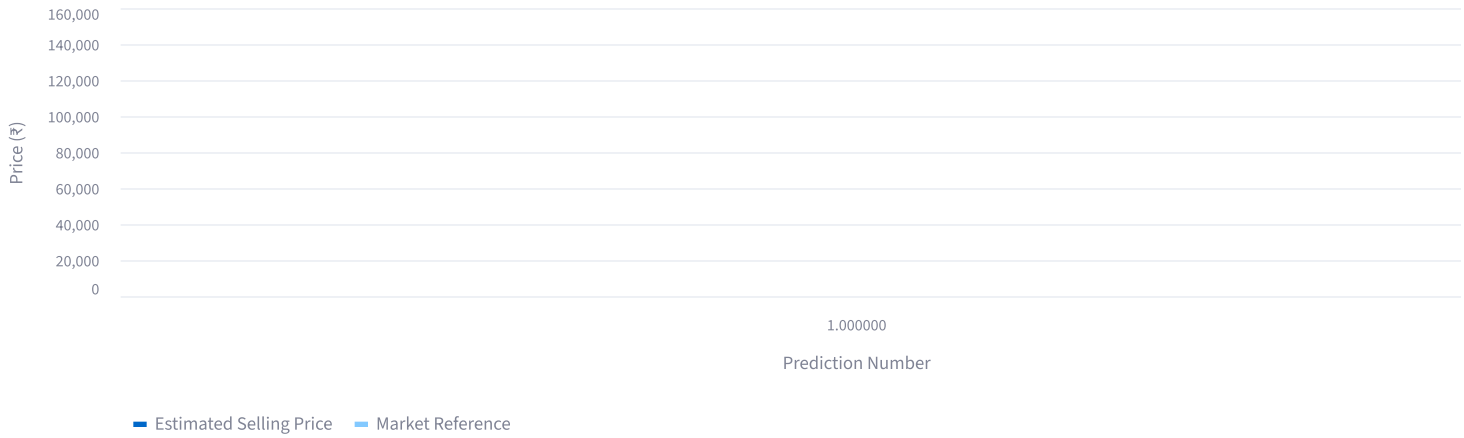

📊 Business Analytics

Analytics are based on predictions made in this app session.

Executive Summary

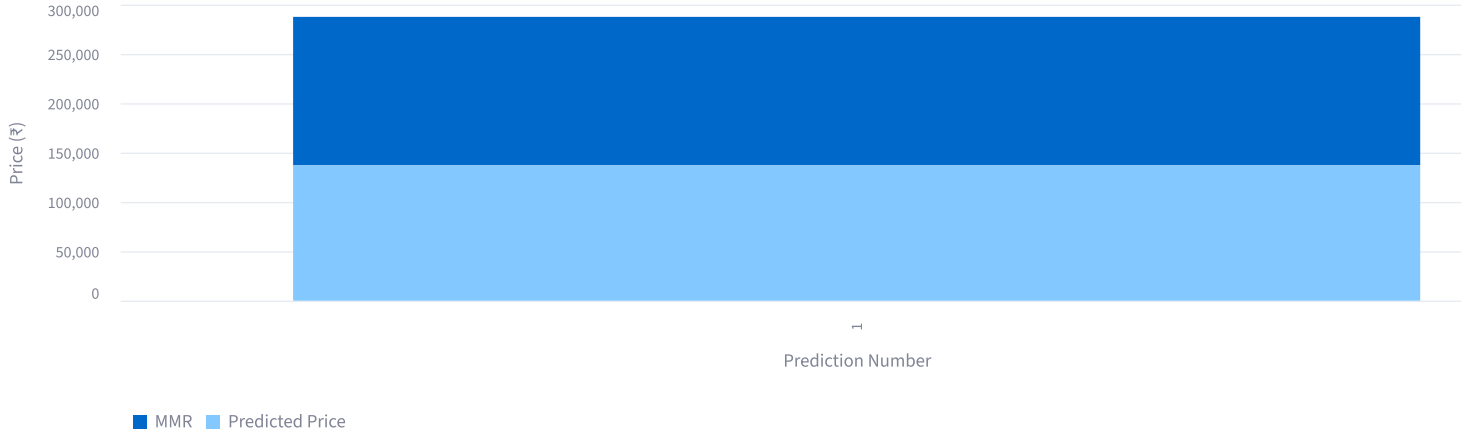

Vehicles Analyzed	Average MMR	Average Estimate	Average Difference
1	₹150,500.00	₹137,135.00	₹-13,365.00

Estimated Price vs Market Reference

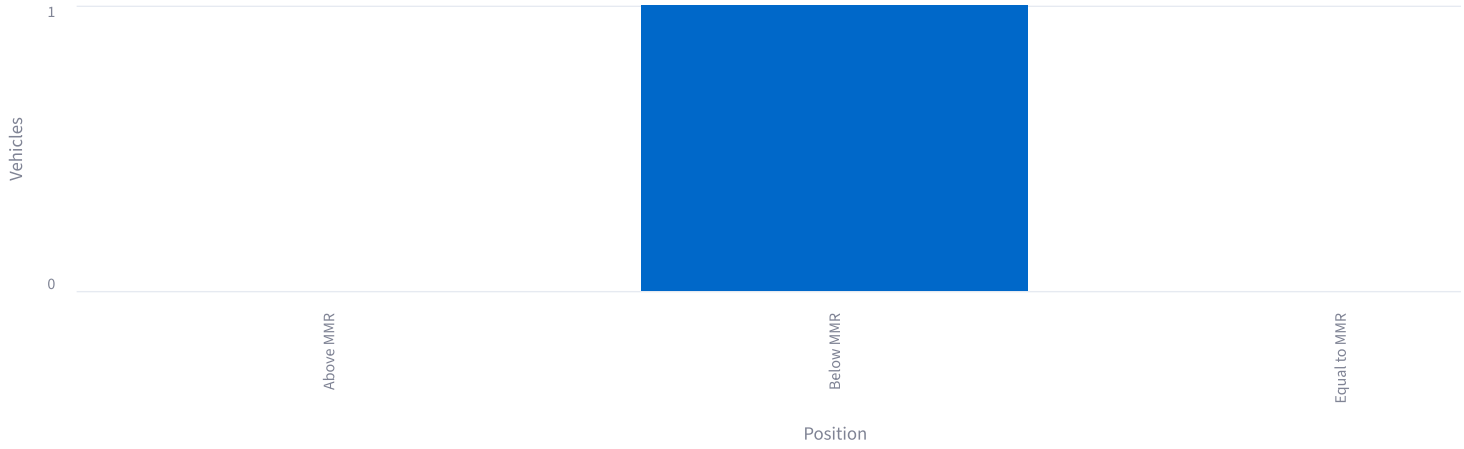

Each point is a separate prediction, not a historical market-price observation.
